Check the Transparency box if you want to see the transparency properties of the image in the new window. The preview tool bar (A) now appears. The box in the top left indicates which tool and tool settings are currently selected. Some controls are on the left side of the box (above the preview image) and some on the top right (below the preview image). To make a selection, use the pointer to click on the desired portion of the image, hold the Ctrl key down and drag the cursor to define the shape. To select the selection path (Ctrl+Ctrl+U), hit Ctrl+U, and then click on the target area. When the path is selected, hit the Delete key to delete the selection and then use the arrow keys to define a new path. To delete the selection path (Ctrl+C), hit the Delete key. To delete the entire path, hit the Backspace key (Ctrl+Backspace). To combine two paths, hit Ctrl+C to select both paths and use the Paths Editor to merge them together. Use the Paths menu to select the path tool settings. Toggle Paths to switch between the Selection Paths, Rectangle/Freehand/Ellipse, Line Segment, Polyline and the Shape or Curves options.
